AYATULLAH BINTANG QURNE

Indonesia, Jember | +62 858-5090-1520 | Bintangqurne07@gmail.com | LinkedIn | Portfolio | Github

PROFESSIONAL SUMMARY

Computer Science student and Fullstack Developer with hands-on experience building web applications using React, TypeScript, Laravel, Express, Prisma, and MySQL. Experienced in developing responsive interfaces, REST APIs, authentication flows, and database-driven features through academic, bootcamp, and organizational projects.

TECHNICAL SKILLS

- Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Vite
- Backend: Node.js, Express.js, Laravel, REST API, GraphQL
- Database & ORM: MySQL, PostgreSQL, MongoDB, Prisma, Sequelize
- Tools & Practices: Git, GitHub, Docker, Postman, Figma, API Integration
- Data Science Foundations: Python, SQL, Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Data Visualization, Machine Learning Fundamentals

EXPERIENCE

Undergraduate AI Researcher — BINUS University

Mar 2026 – Present

- Trained, tuned, and evaluated deep neural networks (transformer- and attention-based) in Python under faculty supervision, resulting in three co-authored papers accepted at international conferences:
  - “Spatial-Channel Parallel Gating with Orthogonality Constraint for Brain Tumor Segmentation in SwinUNETR” — ICIMTECH 2026 (Aug 2026)

EDUCATION

B.Sc. Computer Science — Bina Nusantara University

Jul 2024 – Apr 2028 (Expected)

- Relevant Coursework:
  - Web Development & Software Engineering: Data Structures, Algorithm & Programming, Object-Oriented Programming, Software Engineering, Database Technology
  - Data Science Specialization: Machine Learning, Artificial Intelligence, Data Mining & Visualization, Big Data Infrastructure & Technology

TRAINING & CERTIFICATE

Full Stack JavaScript Bootcamp Participant — Hacktiv8

Nov 2023 – Apr 2024

- Completed an intensive full-stack development program covering JavaScript, Node.js, Express, PostgreSQL, React, Next.js, TypeScript, React Native, MongoDB, REST API, and GraphQL.
- Built individual and collaborative web application projects using modern frontend and backend development practices.
- Applied Git-based collaboration, API integration, authentication, database design, and responsive web development.

PROJECTS

Bncc.net — Frontend Developer

Feb 2026

- Handled a complete redesign of the official Bina Nusantara Computer Club website. Rebuilt the frontend from the ground up with a focus on modern UI, better user experience, and a visual identity that reflects the organization's brand.

Technoscape — Project Manager

Apr 2026 – Jun 2026

- Led the end-to-end technical coordination for Technoscape, Bina Nusantara Computer Club's annual flagship event featuring workshops, seminars, and a hackathon. Acted as the bridge between frontend and backend teams —

evaluating and aligning tech stack decisions, managing cross-functional workflows, and ensuring both sides shipped on time. Translated event requirements into clear technical scopes for the dev team.

Hive — Fullstack Developer

- Built Hive, a collaborative productivity tool designed to make team coordination smoother. The core feature is smart meeting scheduling powered by Google Calendar integration automatically finding the best time slots based on each team member's availability. Currently expanding the platform to support file management and deeper team collaboration workflows.

Credit Guard — ML Engineer

- Compared 7 ML models with Optuna tuning and threshold optimization; SHAP for transparent, explainable risk predictions; deployed as a web app. (2026)

HolyBin — Fullstack Developer

- YOLO-based sorting on an ESP32/MicroPython → Flask/OpenCV edge → Next.js/Firebase stack, with a live monitoring dashboard. (2026)

Judol Chat Moderator — (Fullstack Developer & ML Engineer (In Development))

- Developing a service that automatically detects and removes online-gambling ("judol") spam from livestream chat in real time, trained and integrated a text-classification model for spam detection alongside real-time chat monitoring and filtering. (2026)

LEADERSHIP & ACTIVITIES

Manager R&D — BNCC Malang

Sep 2025 – Present

- Collaborate with cross-functional teams to define, plan, and execute organizational work programs and technology initiatives.
- Manage and maintain microservices and server environments using Docker, Portainer, and Git-based workflows.
- Configure CI/CD pipelines with GitHub Actions to support automated builds, testing, and deployment processes.
- Support deployment and infrastructure reliability by implementing services such as Redis and coordinating application releases.

Mentor — BNCC Staff of Research and Development

- Became the mentor for activists of the Research and Development Division in Front-End Development.

Praetorian Back End — BNCC Learning & Training

Oct 2025 – Apr 2026

- Delivered backend learning sessions for BNCC Malang members, covering web development fundamentals from HTML and database concepts to Laravel development.
- Developed learning materials and hands-on exercises on Laravel fundamentals, MVC architecture, routing, controllers, database migrations, and CRUD operations.
- Mentored participants throughout practical sessions, provided technical guidance, and helped troubleshoot implementation issues.
